Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. Receipt is acknowledged of the amendment filed on October 17, 2006, which has been fully considered in this action.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 5-7, 11-13 and 17-20 are rejected under 35 U.S.C. 102(b) as being anticipated by US 2002/0071906.

US 2002/0071906 discloses all the featured elements of the instant invention, note specifically, note supersonic kinetic spray system /nozzle with a powder injector/feeder 3, see Fig.1. As to the cross-sectional expansion rate, see paragraph [0011], lines 4-8, where at least a 1.0 millimeter squared per millimeter expansion rate is provided with the dimension of the exit end of the divergent portion of the nozzle and length of the duct 4. As to the temperature of the gas, see paragraph [0009], lines 5-7. As to the particle sizes and velocity of the particles see paragraph [0009], where it is disclosed that the contents of U.S. Patent No. 5,302,414 is incorporated by reference and wherein U.S. Patent No. 5,302,414 discloses particle diameters and velocities that fall within the claimed ranges.

The apparatus of US 2002/0071906 is capable of performing the method and its steps as claimed.

Allowable Subject Matter

4. Claims 2-4, 8-10 and 14-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments filed October 16, 2006 have been fully considered but they are not persuasive.

In response to applicant's arguments that Rusch does not disclose teach or otherwise suggest a nozzle including a diverging region with a portion having a cross-sectional expansion rate of at least 1 millimeter squared per millimeter, note that the examiner considers the diverging region be the portion after the throat 21 and for at least one inch (i.e. 25.4 millimeters) after in the duct, this would provide a portion having an expansion rate of at least 1 millimeters squared per millimeter but less than 2.5 millimeters squared per millimeter.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
